Are We Over-Governed?

Even before existing conditions and present difficulties began to force men in public life, the leaders in finance, industry and business, and overburdened taxpayers in general, to give heed to the cost of operating our governmental businesses, national, provincial, municipal and educational, the question: "Are We Over-Governed?" had sporadically arisen. Many people believed we were, and probably the average man if asked the question would unhesitatingly have answered "Yes," adding, "But what can be done about it?"

In answering "yes," Mr. Average Canadian would recognize the fact that in this far-flung and sparsely settled Dominion we have ten Parliaments, ten Governments, ten civil services, to administer the national and provincial affairs of ten million people. That, in addition, we have Commissions, Bureaus, Boards, of all kinds; thousands of municipal units, and tens of thousands of boards of school trustees, with a multiplicity of lower, intermediate and higher courts of law. He would be contemplating the enormous annual output of school board and municipal by-laws, Provincial and Federal statutes, rules and regulations beyond computation. "Yes, we are over-governed," he would say, and, without actual knowledge of the local government institutions in the Old Country, possibly add: "Look at England, Scotland and Wales with only one Parliament and one Government for forty odd millions of people."

But in asking, in reply, "What can be done about it?" Mr. Average Canadian would have in mind the fixed constitution of Canada (B.N.A. Act), the written constitutions of the Provinces with their stated boundaries, the strict division of legislative and administrative authority between the Dominion and the Provinces. He would be giving thought to racial differences, to language difficulties, to differences of creed, to separate systems of schools, and, perhaps above all else, to those many local jealousies, sectional ambitions, business considerations,—in a word, all the selfishness of mere humans individually, and in the aggregate as communities, which would stand in the way of co-operation, co-ordination, amalgamation to bring about a reduction in governmental units. So, with a fatalistic shrug of the shoulders, he exclaims: "What's the use, what can be done about it; it's a mess, but there is no way out, so we might just as well grin and pay the piper."

But now the Canadian people have been paying the piper so long, and the cost of the tunes played have become so excessive, that the grin has faded from their faces, and many are beginning to ask themselves a new question, namely: "Are we as a people so lacking in initiative and determination, so barren of ideas and ability to solve difficult problems, that we have become supine and helpless? Is it not time that we grappled with this thing that is crushing us and cut off some of the tentacles sucking our economic lifeblood away in taxes?"

The outcome of this new orientation in thought about these matters is the suggestion that the unit of representation in various bodies be enlarged, thus reducing the number and size of such bodies. For example, it is suggested that the small rural school districts, and even the small rural municipalities which exist in the Western Provinces, have outlived their usefulness; that the isolated school district be abolished and schools within a municipality be administered by one board; that several adjacent rural municipalities be merged into one.

To illustrate, and taking the Saskatchewan rural municipal system for this purpose. A rural municipality consists, as a rule, of nine townships, that is an area 18 miles square. This system was adopted, and the Province so divided, when there were no good roads as we know them, only trails; when there were no automobiles and people travelled on horseback or by buckboard; when there were no rural telephones. Under these conditions an area 18 miles from east to west and 18 miles from north to south was considered quite large enough for local municipal purposes. But today four such municipalities could be merged, providing a municipal unit 36 miles by 36 miles which, with rural telephones, good roads and the automobile could be administered even more easily than the one-quarter of the same area could be twenty-five years ago. Yet the expenses of three municipal councils would be saved, including three municipal offices, three paid secretary-treasurers, three auditors, and many other costs entailed by duplication in overhead administration and management.

This is but a sample of the suggestions being advanced. It is deserving of consideration and discussion at least. The same idea as applied to Provinces will be dealt with in the next article of this series.

One of the most important parts of a new instrument used to measure heart-beats is a gold-plated wire that is so fine as to be invisible to the naked eye.

For Burns and Scalds.—Dr. Thomas' Electric Oil will take the fire out of a burn or scald. It should be at hand in every kitchen so that it may be available at any time. There is no preparation required. Just apply the oil to the burn or scald and the pain will abate and in a short time cease altogether.

Anyway, the bachelor who succeeds in telling his married friends how to get through the sea of matrimony is some buoy.

This Year's Total Eclipse

The belt of totality of the eclipse of the sun on August 31, 1932, roughly 100 miles wide, passes from the Arctic regions via the east coast of James Bay, continuing down through the province of Quebec and crossing the St. Lawrence just east of Montreal; thence it continues southward and passes into the ocean by way of Maine.

Bronson: "Why did you bargain for a reduction of 15s. on that suit when you know you don't mean to pay for it?"

Bright: "So that the poor tailor won't lose so much."

Sorry To See Night Coming She Could Not Sleep

Mrs. K. McElroy, Kirkfield, Ont., writes:—"I was very nervous and run down, was short of breath, and had smothering feelings, and was sorry to see night coming as I could not lie down or go to sleep."

I was advised to use Milburn's Heart and Nerve Pills. I took seven boxes and am now completely relieved; can sleep fine all night, and have gained in weight."

A "One-Man" Dog

Animal Covers 1,500 Miles In Arctic To Find Master

One of the most unusual dog stories in the north country was revealed at The Pas, Manitoba, on the arrival of George Harrison, widely known trapper. Harrison, who returned from trapping north of Indian Lake, 1,500 miles north of The Pas, Manitoba, told of his former lead dog, whom he left with a friend there about a year ago.

The dog was growing old and he decided to give it a good home with a friend when he came in with his catch of furs last season. He left the dog in November of 1930.

Late in January the dog was missing from his home. Three months later, with bleeding paws and reduced to a skeleton, he was waiting to greet Harrison when he got up one April morning. The dog covered the hazardous trail back to his old home in some of the worst weather in history.

Harrison will keep the dog with him because he does not believe he would survive another such trip.

Rheumatism So Bad He Had to Quit Work

Albert Berger Not Bothered Since Relieved by Dr. Williams' Pink Pills.

Working Every Day Now.

"I was terribly bothered with a weak back and rheumatism in my shoulders," writes Albert Berger, Wingle, Ont. "It got so bad I had to stop working and stay in the house. I was two weeks in bed, when a friend advised me to try Dr. Williams' Pink Pills. I gave the Pills a fair trial, and they relieved me right away. My back is good and strong now, and I am working every day. I have never been bothered with rheumatism since. I recommend them for anyone suffering from Rheumatism, Lame Back, Sciatica." Rheumatism and kindred ailments thin the blood very rapidly. Dr. Williams' Pink Pills enrich the blood stream and create new red blood cells, which is the reason they are so successful in combating such ailments. Equally good for all rundown or nervously exhausted people. Try them. At your druggist's, 50c. 273

Honored For Railroad Service

The first woman to complete a record of almost half a century of service in Canadian railroading was honored at Montreal when Miss M. A. McLeod, an employee in the comptroller's office of the Canadian National Railways, received a presentation. Miss McLeod joined the old Grand Trunk Railway in 1886.

Persian Balm preserves and enhances women's natural heritage of beauty. For sheer feminine loveliness it is unrivalled. Tones and rejuvenates the skin, and makes it exquisite in texture. Delightful to use. Smooth and velvety, it imports a youthful charm to every complexion. Indispensable to all dainty women. Especially recommended to make hands soft and white. Delicately fragrant. Preserves and enhances the loveliest complexions.

Was Slightly Mixed

"Who is the King of England?" asked His Honor Judge F. A. G. Ouseley, while presiding at the naturalizations examinations in Swift Current.

"R. B. Bennett," came back the reply from a dusky would-be citizen of European extraction.

Miller's Worm Powders will purge the stomach and intestines of worms so effectively and so easily and painlessly that the most delicate stomach will not feel any inconvenience from their action. They recommend themselves to mothers as a preparation that will restore strength and vigor to their children and protect them from the debilitating effects which result from the depredations of worms.

Determined By Figures

A mathematical formula to enable scientists to determine just how much vitamin "B" a person needs to improve his system has been reported to the National Academy of Sciences by Prof. George R. Cowgill of Yale University.

The young man—"Do you prefer a home wedding?"

The young miss—"Yes, but our house is being sold for taxes."

A Royal Recipe

Old Fashioned Plum Pudding Of Queen Victoria's Day

Mrs. W. H. Austin, of Toledo, is one woman who can keep a secret. For half a century she has kept secret a royal recipe for old-fashioned plum pudding of Queen Victoria's day. It is to be kept secret and handed down as a legacy to her daughter.

When 17 years old Mrs. Austin was cook's assistant in the Lion Hotel at Nottingham and received the recipe from the former mistress of the kitchen in the castle of the Duke of Rutland on a promise that it never would be given out or sold. In those days the cooks memorized the recipes, which never were written down for fear they would be stolen.—Cleveland Plain Dealer.

Canada's Shingle Output

Shingles to the value of \$9,423,363 were cut in Canada in 1929, according to official returns issued by the Dominion Bureau of Statistics, working in co-operation with the Forest Service, Department of the Interior. Almost ninety-nine per cent. of these shingles were made of cedar.

Miss Elizabeth Roberts, who died at the age of 101 was one of seven sisters of Bank Cottage, England, who never married.

Sweet and palatable. Mother Graves' Worm Exterminator is acceptable to children, and it does its work surely and promptly.

After being engaged for 43 years, a Missouri couple have been married. They were both from Missouri.

Institute Of Pacific Relations

Invitation Extended To Hold Next Conference In Canada

An invitation will be extended to the Institute of Pacific Relations, which met last year in Shanghai, China, to hold its next biennial conference in Canada, it was decided at a meeting in Toronto of the executive council of the Canadian Institute of International Affairs. The Canadian Institute is the national unit of the Institute of Pacific Relations in the Dominion.

Steps were taken at the meeting to participate in a round-table conference on diplomatic relations with the British Empire, which it is hoped to hold next year, possibly in Canada.

Bad Constipation And Sick Headaches Ended By Vegetable Pills

Formerly a wreck from Constipation, Sick Headaches and Indigestion, Mr. V. H. writes: "It was a red-letter day for me when a friend recommended Carter's Little Liver Pills. Results have been marvellous." Because they are PURELY VEGETABLE, a gentle, effective tonic to both liver and bowels, Dr. Carter's Little Liver Pills are without equal for correcting Acidity, Bilioousness, Poor Complexion and Indigestion. 25c. & 75c. red plgs. Ask for Carter's by NAME.

The modern hen lays as many as 300 eggs in a year, in contrast to about 26 eggs laid by her distant jungle ancestors.

Another thing that nations owe one another is a living.

"I'm going, anyway"

THE modern Miss needs no "time out" for the time of month.

If you've ever taken Aspirin for a headache, you know how soon the pain subsides. It is just as effective in the relief of those pains peculiar to women!

Don't dedicate certain days of every month to suffering. It's old-fashioned. It's unnecessary. Aspirin will always enable you to carry-on in comfort. Take enough to assure your complete comfort. If it is genuine Aspirin it cannot possibly hurt you. Aspirin tablets do not depress the heart. They do not upset the stomach. They do nothing but stop the pain.

Headaches come at inconvenient times. So do colds. But a little Aspirin will always save the day. A throat so sore that you can hardly swallow is made comfortable with one good gargle made from these tablets. Neuralgia. Neuritis. Rheumatism. Pains that once kept

people home are forgotten half an hour after taking a few of these remarkable tablets. So are the little nagging aches that bring fatigue and "nerves" by day, or a sleepless night.

Genuine Aspirin tablets cost so very little after all, that it doesn't pay to experiment with imitations!

Made in Canada

Most Of Our Pork Products Go To Great Britain In The Form Of Wiltshire Cut Sides

Canadian swine producers who have made any study of the breeding, feeding and marketing of bacon hogs have come to realize that most of our exportable pork products go to England in the form of Wiltshire-cut sides. They have learned that the term "Wiltshire" is a trade name given to any carcass of pork which is cut in a particular manner. A Wiltshire side is simply half of the hog with the head and feet cut off, the shoulder blade pulled out, and the backbones removed.

Usually these sides are exported from Canada in a pickled or mild cured state. The smoking operation is performed later in England by the large wholesalers and distributors, who vary the degree of smoke with the preferences of the particular market to which any lot of sides is to go.

Questions are often asked as to what cuts are made of the Wiltshire

where an awkward bone, known as the "oyster bone," must be removed, which makes slicing difficult and somewhat reduces the value.

"The 'prime back' (cut C), provides the best rashers in the side as a whole and is in greatest demand. It is usually the most valuable portion; hence the necessity for length in the back, which is required to be level also; a dish or scooped back means less weight and less depth of loin. An important requirement is that a transverse section of the back, cut over the shoulder, should be somewhat arched. Where this section is flat above the shoulder it is excessively fat and consequently heavy in that part.

"A straight underline and thickness are essential in the belly, as they denote that the 'thin streaky' and the 'flank' (cuts H and I), will not be distended and, consequently, thin. When the belly is thick the value of

tains much gristle and, next to the 'flank' is the cheapest cut of the side." Figure 3 simply places the cuts which have been described above in relation to the trimmed wiltshire side. Slight differences in the appearances of some cuts as between Figures 2 and 3 can be accounted for by the fact that when the hog carcass is hung from the rail it naturally stretches out to resemble Figure 3.

From the remarks on the relative retail values of the various cuts it will be seen that swine producers, if they would turn out a product commanding the highest wholesale and retail prices, must continue to keep before them the objective of the bacon type hog—light of shoulder, lengthy between shoulder and ham, with a full lean tapering ham meat well down towards the hock, and with a straight underline denoting fullness and firmness of belly.

Now when Canadian hog producers must set themselves to a policy of continued production for the overseas market, the point of quality in the hogs, and thus in the finished product, may in the long run mean all the difference between an unprofitable or a profitable export bacon trade of considerable proportions.

Policing Of Alberta

R.C.M.P. To Take Over Duties Under Three Year Agreement

Superintendent H. M. Newson, director of the criminal investigation branch at Royal Canadian Mounted Police Headquarters in Ottawa, will be placed in direct charge of the policing of Alberta when the federal force takes over the Alberta provincial police on April 1. He will hold the rank of assistant commissioner.

Information to this effect was released by Hon. J. P. Lymburn, Alberta Attorney-General, in a description of the terms of the three-year agreement just completed between province and Dominion. Headquarters of the R.C.M.P. in Alberta will be in Edmonton.

The agreement specifies that a force of 220 men is to be maintained in Alberta and that all men, in good standing in the provincial force are to be retained. All of the duties hitherto performed by the provincial police will be performed by the R.C.M.P.

Did Not Check Right

The freight agent on the C. and N. W. Railroad received a shipment in which was a donkey, described on the freight bill as "one burro." After checking his goods carefully the agent made his report: "Short, one bureau; over one jackass."

Magistrate: "The defendant swears he was perfectly sober."

Policeman: "He was absolutely intoxicated. If he had been perfectly sober he would have known he was drunk and not made a disturbance."

Farmers Meet To Study Methods Of Combatting Soil Drifting And Moisture Conservation

One of the most unique agricultural meetings ever held in Canada was held Tuesday, January 26th, in the chapel at the Regina Jail by the farmers in the area surrounding the Jail at the call of the Saskatchewan Department of Public Works. The meeting was largely attended, practically one hundred per cent. of the farmers in the one-half township area surrounding the Jail being present. Some seventeen carloads of farmers drove in to the Jail yard. Every chair in the reception room was filled so that it was necessary to move up to the Jail chapel in order to accommodate those who attended.

Mr. C. M. Learmonth, the Superintendent of Institutional Farms, acted as chairman. The first speaker was the Hon. J. F. Bryant, Chairman of the Commission on Conservation, and Minister in charge of Institutional Farms. Mr. Bryant welcomed the farmers and remarked that this was the first time in the history of Canada that a large body of farmers had willingly gone to Jail to study farming. At Dartmoor recently the prisoners tried to get out of Jail because they did not get sugar on their porridge, whereas today a large number of farmers in Saskatchewan had willingly come to the Jail so that they could discuss improving farming methods.

Mr. Bryant dealt at length with the Commission on Conservation, pointing out the work which they had accomplished to date and what they were endeavoring to do, giving information on the climatic conditions, on conservation of water and on the afforestation programme, and pointed out the object of the meeting.

Mr. W. H. Gibson, Superintendent of the Experimental Farm at Indian Head, advocated the plowless fallow, or surface cultivation. He thought that more of this should be done. The farmers had worked their land too much and made it too fine in the past. He recommended the duck-foot cultivator rather than the disc-harrow. He did not advocate harrowing after the drill but rather the use of the packer. He stated that the precipitation in 1931 was one-half of the normal precipitation.

Mr. S. H. Vigor of the Department of Agriculture, Regina, discussed strip farming and the benefits in preventing soil drifting, without advocating general strip farming all over the Province. He also spoke of forage growing, recommending a trial of brome grass, western rye and sweet clover. His address was followed by an interesting discussion by the farmers present.

Norman Ross, Director of the Forestry Service, Indian Head, stated that it was a combination of different methods that would produce the desired results. There was a liability in good times to forget the trying experiences of bad years. He developed the thought that if shelter belts were good for the garden and buildings, it was logical that if planted on a large scale they would be of benefit to the crops. He produced evidence indicating successful hedge plantings all over Western Canada and advocated the commencement of a demonstration area and continuing of different methods in a very convincing speech, after which he answered all questions asked on tree planting.

W. H. Ford, a prominent farmer from Indian Head, gave his experiences with reference to a half-section which he divided with a single caragana hedge planted north and south at right angles to the prevailing winds. Mr. Ford was very enthusiastic about the hedges, and stated that the first thing he would do in the light of his years of experience, if he were coming to the Regina plains to farm, would be to plan his farm and then lay out and plant caragana hedges. Mr. Ford farms on a large scale with power machinery. He was strongly in favor of planting caragana hedges one mile to one and one-half miles long.

In 1931, Mr. Ford threshed from a one-hundred acre field protected by hedges, 1,600 bushels of No. 1 Northern wheat, when his neighbors got less than 5 bushels per acre on similar land with similar methods but without the hedges. From years of experience and observation, he strongly endorsed the planting of hedges. Mr. Ford has a beautiful home farm, the buildings surrounded by very fine trees, including firs, elms, ash and pine, which enable him to grow apples, crabapples, plums, plum-cherry hybrids and the small fruits very successfully.

Mr. C. M. Learmonth then outlined the proposed Township Farm Improvement Area, and suggested the forming of an organization of the farmers in the district surrounding the Institutional Farm to carry out the combination scheme of strip farming, grass and clover growing with wind-breaks and shelter belts, and fields protected with caragana hedges. He pointed out that there were already planted ten acres of caragana seed for seedlings on the Jail farm which would produce approximately one million seedlings for free distribution in 1933, and a similar acreage would be put in the spring of 1932.

The farmers in the district were very much interested in the meeting and the action of the Government in taking the proposed step, the first of its kind in the Province, and the fact that their area was chosen for experimental and demonstration purposes, and that they had the opportunity of working together in the interests of all the farmers of the Province to show the best methods of combatting soil drifting and present climatic conditions. A committee composed of three was agreed upon to interview the individual farmers in the one-half township area with a view to getting them to agree to follow the suggestions made. The committee consists of C. M. Learmonth, representing the Government Institutional Farms, a representative farmer in the one-half township area, together with a representative of the Provincial and Federal Governments. This meeting was the first concrete proposal to carry out the recommendations of the sub-committee of the Commission on Conservation and Afforestation, with reference to the prevention of soil drifting.

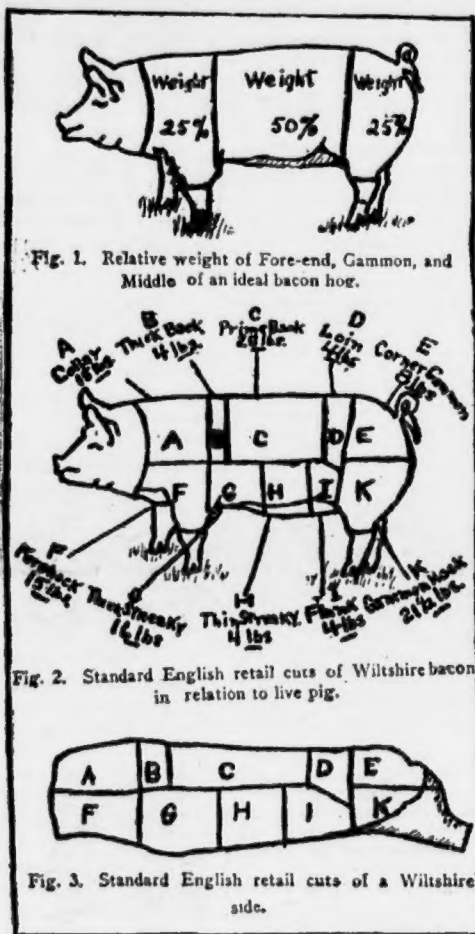

Just His Class

They were parting at the door after a little quarrel. He had tried to make it up, but with no success.

"Very well," he said, turning to depart, "I'll marry a girl that can take a joke."

"No doubt about that," was the crushing reply. "That's the only kind of a girl you'll get."

W. N. U. 1928

side for retail selling. An explanation of the method of cutting, together with interesting comments on the various cuts and their relative value, is found in a comprehensive publication by the Ministry of Agriculture and Fisheries in England, entitled "A Report on the Pork and Bacon Trades in England and Wales." The three outline figures reproduced herewith are taken from that report, adapted slightly in order to conform with the weights and percentages of Canadian standard bacon hogs and their product.

Figure 1 is of a bacon hog of approximately 200 lbs. live weight. This hog will cut into two Wiltshire sides, each weighing about 60 lbs. In other words, Wiltshires make up 60 per cent. of the live weight of our bacon hogs. After the head and feet are removed the middle of an ideal bacon hog should represent about 50 per cent. of the weight of the side, with the shoulders and hams about balancing.

Figure 2 sets out the relative position of the various retail cuts to the live hog. The comment in the report on these various cuts is interesting and instructive.

"A long and level back is required because the middle of the carcass fetches the highest price per pound and contains the greatest proportion of the entire weight, as will be seen in Figure 1. Cut 'B,' known as the 'thick back,' contains a relatively heavier proportion of the rib bones than the remainder of the back; the back fat also tends to be thicker at this point, and further, the meat begins to be of the nature of that of the 'collar.' Hence this cut has a lower selling value than the remainder of the back except cut 'D,' the loin,

these cuts is increased. The 'flank' has usually a fair proportion of lean, but this does not penetrate deeply. Flank rashers are normally narrow, and, if the cut is excessively thin, they become objectionably attenuated when fried. 'Thin streaky' suffers from the same disadvantage, but it is normally thicker than the 'flank.' The 'thick streaky' (Cut G), depends for quality upon the thickness of the belly at H and I, contains alternate layers of lean and fat, and is of more value than the remainder of the lower cuts on account of its greater thickness and interleaning.

"Breadth, width, and depth to the hock are required in the hams, as these features denote plenty of flesh which is highly desirable in a cut bone. The bone is responsible for the fact that the 'gammon hock' (cut K), is retailed at a relatively lower price than more fleshy cuts. The upper part of the ham, known as the 'corner gammon' (cut E), contains but little bone; it consists almost entirely of lean flesh and is one of the highest priced cuts of the carcass. The high setting of the tail is held to denote a higher proportion of flesh in cut 'E' than when the tail is set low; on the other hand, a tail set too high frequently denotes an excess of back fat.

"Lightness of the fore-end and shoulder is essential. The 'collar' (cut A), containing overlapping muscles and much gristle, is a cheap cut, its value being also reduced by the fact that the shoulder blade is removed prior to curing of the side, and this makes it a difficult cut to slice. The 'forelock' (cut F), suffers from the same disadvantage as the 'gammon hock,' namely an excessive proportion of bone; it also con-

Noted Britishers in Bahamas

Completely recovered from the injuries he sustained when he was run down by an automobile in New York, the Right Honourable Winston Churchill, former Chancellor of the Exchequer of Great Britain, and one of the Motherland's most versatile statesmen, is shown with his beautiful daughter, Diana, as they enjoyed the gorgeous sunshine at Nassau, Bahamas. Saskatchewan Motor Licenses

Minister Of Highways Explains Reasons Why Increase Was Necessary This Year

Decision of the Saskatchewan Government to increase motor license fees by \$5 per license, has been subject of some criticism, and some protests have been received by the Department concerned, according to the Hon. A. C. Stewart, K.C., Minister of Highways.

Discussing the situation, Hon. Mr. Stewart stated suggestions had been made that further increase of the gasoline tax might be used as an added source of revenue and that the motor license fee might be revised downward, if at all. This matter had been carefully considered, said Mr. Stewart, and the motor license fee increase ultimately decided upon for revenue purposes. Elaborating his statement, the Minister said: With practically one quarter of the population of the province not only incapacitated from contributing to the revenue but receiving the help necessary to sustenance from the Government, the urgent need for increased revenue is obvious. In taking this action the Government is merely placing the license fee back where it was prior to January 1st, 1930. At that time a regulation reducing the motor license fee by five dollars was adopted. It has been found however that during the two years since then the number of motor licenses have decreased. In 1929 when the higher fee prevailed there were 108,630 licenses issued during 1929. In 1930 there were 108,161 private car licenses issued, and in 1931 the figures had fallen away to 91,276 or 16,885 less licenses than in 1930. On the other hand the gasoline tax had been increased from three to five cents per gallon. This has not resulted in increased revenue proportionate to the increase in the tax. Directly the tax was increased, the exemption claims increased and many claims for exemptions made under the five cent tax that would not have been made under the three cent tax. Judging from the revenue figures under this item the conclusion can hardly fail to be drawn, that its increase has led to evasions and misrepresentations that would not have occurred had it remained at the previous figure. It is also apparent that gasoline has been used in motor cars for which exemptions were often claimed and obtained, without the possibility of any system being devised for its prevention. This experience has been similar to that of other provinces and states where the gasoline tax has been increased. When the tax was increased there was also an increase in the bootlegging of gasoline from the States and from Alberta particularly of a cheaper type of motor fuel like naphtha and distillate. In the portion of Saskatchewan contiguous to the Alberta boundary, the revenues from the gasoline tax have been greatly reduced. Legislation will be introduced to deal with this bootlegging system, but conditions in this respect are difficult, and it is apparent that an increase in the gasoline tax instead of increasing the revenue in accordance with the increase would lead to further tax evasion, wrongful claims for exemptions, and increase possibilities and profits of bootlegging.

In this connection there has been trouble with some of the oil companies failing to pay to the Government the full amount of gasoline tax collections. Previous to this year the oil companies were paid a commission of two and a half per cent. on their collections. In view of the fact that the tax was raised from three to five cents per gallon and no extra work entailed on collections, the commission was reduced from two and a half per cent. to two per cent. In spite of this fact some of the oil companies have not complied with this regulation, but have deducted two and a half per cent. from the collections remitted to the Government. If this condition continues it may be necessary to pass legislation taxing these companies by direct taxation to the extent of this commission, and to make such legislation retroactive. It may also be necessary to consider a direct tax on all gasoline imported into the Province or refined here, instead of the present method of gasoline tax collections, and thus obviate all possibility of defrauding the Government. Last year a good deal of leniency

A SINGLE SIP PROVES IT

was shown with regard to the collection of motor license fees in the drought area, but complaints have been received from farmers who paid their licenses, that neighbors were running their cars without licenses. This year, a strict observance of the Motor License Act will be enforced, and car owners running their cars either by day or night without licenses, will be subject to prosecution and, if the fines are not paid, the consequences will be serious. It is obviously impossible to operate the motor license system if discrimination is shown. A reasonable opportunity will be given to owners to pay their licenses, and the law will then be strictly enforced. The Farmer Government of Alberta, which followed the Saskatchewan reduction of licenses in 1931, is this year increasing their licenses to the same extent as in this province.

Owing to the roads being blocked in the northern portion of the province, few licenses are being taken out in that area as compared with last year. Last Monday, however, the Motor License Branch at Regina was busier than at any previous time in its history. Renewal of operators' licenses should be made when the motor license is purchased, and the old license should be sent in on the application for a new one.

Tells Dyspeptics What To Eat

Strict Diets Often Unnecessary

It is a well known fact that some foods have a strong tendency to produce excessive stomach acidity and consequent indigestion. By omitting from daily meals those foods that experience proves do not agree and limiting the diet to certain tasteless unappetizing foods, stomach troubles may in many instances be slowly overcome. Nine times in ten, however, indigestion, gas, etc., are due to excessive acidity and the premature souring of food in the stomach. Keep the stomach clean and sweet by freeing it of this extra acid and then sufferers can eat the foods they like best and as much as they want in reason and have no stomach trouble at all. Thousands of people do this daily by merely taking after every meal a little Bismarck Magnesia, which can be had at any good drug store in either powder or tablet form. Bismarck Magnesia instantly neutralizes stomach acids, stops food fermentation and meals digest as naturally and peacefully as in the stomach of a healthy child. Stomach comfort means a lot and most folks like good things to eat. Enjoy them both by making Bismarck Magnesia your daily after-eating protection.

Robots Supplant Bobbies

London Finds Automatic Traffic Signals Equally Efficient and Cheaper

Hundred of policemen have been released from traffic duty in London because robots have proved equally efficient and much cheaper.

Automatic signaling will be adopted on a wide scale before long, and all circuses and crossroads will have their flashing traffic lights. "A jolly good job, too," commented one traffic policeman on hearing the news: "Do you think we like to spend our time remonstrating with motorists who say they cannot see our signals? Do you think we call it a man's job? It was pushed on us by the traffic problem, but we have got plenty of more important jobs."

JESUS AND THE MAN BORN BLIND

Golden Text: "I am the light of the world; he that followeth Me shall not walk in the darkness, but shall have the light of life."—John 8.12.

Lesson: John 9.1-41.

Devotional Reading: Isaiah 42.1-7.

Explanations and Comments

The Question Concerning the Connection Between Blindness and Sin, verses 1-3.—The Jews held that calamities were the result of sin. Recall how insistently Job's friends tried to make him acknowledge some sin as the cause of all of his troubles. One day the disciples came upon a man who had been blind from birth, sitting where beggars were wont to sit at the gate of the temple, and they said to Jesus, "Rabbi, who sinned, this man or his parents, that he should be born blind?" The disciples seemingly were voicing here the popular theory in regard to reincarnation, for a man born blind could have sinned only in a previous existence if his blindness were a punishment for sin. The pre-existence of the soul was the ancient Greek idea, and it is the dream of the modern Hindu mystic.

Sin causes suffering, but the disciples' pitiless logic of suffering through sin was quickly denied by Jesus. He threw the responsibility for the man's blindness upon God when He answered, "Neither did this man sin, nor his parents, but that the works of God should be made manifest in him." How could his blindness show forth the works of God? It gave Jesus the opportunity of showing God's power by restoring his sight.

The Blind Man's Sight Restored, verses 6, 7.—Jesus spat on the ground and made clay and with it anointed the eyes of the blind man. Doubtless He did this in order to let the man feel His ministering touch, to awaken expectancy, to arouse the man's faith through the use of means popularly supposed efficacious, and to test his obedience.

The Miracle's Effect Upon the Jews, verses 8-12.—The opening of his eyes naturally so changed the beggar's aspect that those who knew him wondered whether it could be actually he or whether it were some one like him. They questioned him and he told them of his cure.

Jesus Finds the Outcast and Reveals Himself, verses 35-38.—At once Jesus looked for the man and on finding him endeavored to draw out his faith by asking him if he believed on the Son of God. The man did not understand the title, but when Jesus claimed it as His own, the man exclaimed, "Lord I believe," and worshipped Him—he had received not only seeing eyes but inner spiritual vision.

The True Significance Of the Event, verses 39-41.—The comment of Jesus was that He brought spiritual enlightenment to those who, like this man, realized their need of him, and he increased the blindness of those who, like the Pharisees, believed not in Him nor in their need of a Messiah.

India exported 55,000,000 pounds of tea in a recent month.

CABINET CHANGES ANNOUNCED BY PREMIER BENNETT

Ottawa, Ont.—On the eve of the opening of parliament, government appointments came thick and fast. A form of cabinet reorganization and the filling of all four vacancies in the senate constituted the basis of an official announcement by Prime Minister R. B. Bennett which in one sweep cleared the decks for the session.

Premier Bennett handed over the portfolio of Minister of Finance to Hon. E. N. Rhodes, Hon. Alfred Duranleau, Minister of Marine, becomes acting Minister of Fisheries on the assumption of administration of Finance Department by Mr. Rhodes. Hon. W. Gordon, Minister of Immigration and Colonization, is also Minister of Labor and Mines. Senator Gideon Robertson resigned the labor portfolio on account of ill health. Rt. Hon. Arthur Meighen—appointed senator and the conceded choice of Conservative senators as their leader in the upper chamber—enters the Bennett government as Minister without portfolio.

Four new senators were named. With Mr. Meighen, the new members of the Upper Chamber are W. H. Dennis, Halifax, newspaper proprietor; Hon. C. C. Ballantyne, Montreal, former minister in the Borden and Meighen administrations, and Dr. J. A. MacDonald, former Conservative member for Richmond-West Cape Breton.

Santiago Earthquake

Eight Are Killed and 300 Wounded In Disaster

Santiago, Cuba.—A series of earthquakes dealt swift damage in Santiago, leaving a known death toll of eight and a casualty list of 300 wounded.

The agonizing series of tremors left hardly a building in the city untouched, and a few were destroyed.

Governor Jose Barcelo of Oriente Province estimated that the earthquake damage to the city of Santiago would exceed \$100,000,000.

In the first confusion, as all the 130,000 residents fled to open spaces, newspapermen and other eye witnesses estimated the death toll at from 500 to 1,500. All these figures were found to be an exaggeration, however, as dawn and a measure of calm came to the city.

Importing Less Coal

Canadian Purchases Of Anthracite From United States Have Dropped

Ottawa, Ont.—Canada is diminishing its purchases of anthracite coal, an imported fuel. During the last five years imports from United States have dropped 1,000,000 tons and the increase from Great Britain, 350,000 tons, has not been sufficient to offset it. In the calendar year 1931, according to the Dominion Bureau of Statistics, Canada bought 2,236,400 tons of anthracite from United States, 876,300 tons from Great Britain, 60,700 tons from Germany and 4,590 tons from French Indo-China.

Looking For Results

Montreal, Que.—"Merchants and shoppers in the British Isles are looking forward to tangible results from the Imperial Economic Conference to assemble at Ottawa in July," said P. A. Clews, acting European manager for the Canadian National Railways, on his arrival in Montreal for conferences with Sir Henry Thornton and other officers of the system.

Delegate Has Measles

Paris, France.—Joseph Paul Boncour, head of the French disarmament delegation now in Geneva, was reported ill in his Paris home. His ailment was measles.

U.S. Ambassador To Britain

Washington.—Secretary Andrew Mellon of the United States Treasury accepted the ambassadorship to Great Britain.

W. N. U. 1928

Pleads For Faith In League

People Should Give Support Says Hon. Vincent Massey

Winnipeg, Man.—"The free and uncoerced assent of both sides is imperative to a permanent peace basis in Manchuria and the Far East," Hon. Vincent Massey, former Canadian minister at Washington, told members of the Canadian club here in an address on "The Manchurian Crisis."

"However ineffective it may have been in this controversy, we must not lose faith in the League of Nations," he pleaded in referring to recent developments at Shanghai. "Our course should be rather to give it the utmost of our intelligent support."

The Manchurian situation he ranked as something more than a conflict between two peoples. It was really a collision between twentieth century international machinery and a nineteenth century viewpoint.

On his western tour Mr. Massey will address meetings at Regina, Moose Jaw, Calgary, Lethbridge and Victoria. On his way back he will speak at Edmonton and Saskatoon.

Farmers Holding Grain

Over Twenty-Seven Million Bushels In Three Prairie Provinces

Winnipeg, Man.—A total of 27,799,000 bushels of grain still remains in the hands of farmers located near lines of the Canadian National Railways in the three prairie provinces, according to a census taken by the railway company on February 1. Of this total, 19,265,000 bushels are wheat, and 8,533,500 bushels are coarse grains.

Alberta farmers appear the most reluctant to part with their grain. They still retain 9,347,000 bushels of wheat and 4,111,000 bushels of other grains. In Saskatchewan, the farmers still have 7,414,500 bushels of wheat and 2,538,000 bushels of coarse grain, while in Manitoba, 2,304,000 bushels of wheat and 1,884,500 bushels of coarse grains remain to be marketed.

International Plot Suspected

Belief Expressed That Japan Is In Alliance With France and Russia

New York.—J. M. Kenworthy, former Labor member of the House of Commons and retired lieutenant-commander in the British navy, declared Great Britain believed Japan is in secret league with France and Russia in her "seizure of Manchuria and invasion of China proper."

"Oh, I know that sounds sensational," he said, "and I know it has been denied by France. But we believe it just the same, and have some reason for our convictions."

Confiscate Jesuit Property

Madrid.—Authorities throughout Spain began confiscating Jesuit schools, colleges and residences while 3,500 former inmates peacefully disappeared into towns and cities as private residents or embarked for other countries.

CANADIAN IS HONORED

Prof. C. T. Currelly, Director of the Royal Ontario Museum of Archaeology, who has been elected a Fellow of the Society of Antiquaries of Great Britain. This society was founded by King Charles II., at the same time as the founding of the Royal Society. Professor Currelly, it is understood, is the first Canadian to be honored with the initials F.S.A.

Radio League Asks For Federal Policy

Delegation Told Government Can Do Nothing At Present

Ottawa, Ont.—A delegation from the Canadian Radio League, headed by Graham Spry, chairman, urged a national policy for radio programmes, a definite government policy toward the industry, fewer and more high-powered stations, protection for existing radio chain systems and an increased license fee from \$1 to \$3.

Hon. Mr. Duranleau, Minister of Marine, replied the government could do nothing until the judicial committee of the Privy Council renders its decision on the control of radio in the Dominion.

Insurance Rate Increased

On Freight Shipped From U.S. Through Chinese Port

San Francisco, Cal.—Since the start of hostilities, between Japan and China in the vicinity of Shanghai, insurance rates on freight shipped from the United States through the Chinese port have increased 1,500 per cent., it is revealed by insurance brokers here.

Prior to the outbreak of hostilities, the rate was ten cents per \$100 valuation. Today it costs \$1.50 to insure \$100 worth of freight.

Expect Report Soon

Ottawa, Ont.—The report on Canada's five biggest port developments, Halifax, Saint John, Quebec, Montreal and Vancouver, being prepared by Sir Alexander Gibb, British expert, who made an investigation last year at the request of the Dominion Government, is expected to be placed in the hands of the Prime Minister before February 15.

Wage Tax For Manitoba

New Plan Estimated To Net Government One Million Dollars Annually

Winnipeg, Man.—A special tax levy of one per cent. on wages, which it is estimated will net the government \$1,000,000 annually, is planned as part of the Manitoba administration's new taxation programme, it was said in government circles. The tax would be substantially the same as that levied by the British Columbia government.

The tax will be collectable from all employees in the province on their wages, salary or other source of income, on the indemnity of members of the Legislature, the House of Commons and the Senate, and of judges of the courts whether their salaries are paid out of crown revenue in the right of the Dominion or Province.

An exemption of \$25 a week is to be allowed the wage-earner married and with dependents and \$15 a week in the case of other employees.

Opening New Northern Road

Will Connect Hudson Bay Junction, Saskatchewan, With The Pas, Manitoba

The Pas, Man.—Citizens of this Northern Manitoba town are looking forward to their first highway connection with the outside world next summer. Word received that the right-of-way for a road from here to Hudson Bay Junction, Sask., will be cleared by spring and ready for grading. A stretch of 18 miles through muskeg remains to be cleared in the Saskatchewan section.

With a new road being opened from Hudson Bay Junction to Prince Albert and Saskatoon it is expected motorists from the south will be able to drive here before the end of this year's tourist season.

Soviets So Less Wheat

Decrease On Fall Programme Mapped Out By Government

Ottawa, Ont.—Autumn sowing for all grains in Soviet Russia last year amounted to 95,400,000 acres representing a decrease of 10.8 per cent. from the official fall sowing program mapped out by the government, according to a cable received by the Department of Trade and Commerce.

Official soviet plans call for an increase of two per cent. over last year in the spring sowing of wheat. The cable says Russia plans to seed 64,700,000 acres this spring in wheat, as compared with 63,500,000 acres last year.

Bandits Get Big Haul

Vancouver, B.C.—Two youthful bandits, one of them armed with a revolver, held-up Miss Edna Webster, stenographer in the employ of the Vancouver Dry Goods Company, robbed her of \$646, the weekly payroll of the company, and escaped in a stolen car. Miss Webster, who was returning from the bank with the money, was struck on the head with the butt of a gun.

DATE IS SET FOR IMPERIAL ECONOMIC MEET

Ottawa, Ont.—Monday, July 18, is the date for the opening of the Imperial Economic Conference at Ottawa, it was intimated by highest authority.

Great Britain, the Irish Free State, Australia, New Zealand, South Africa, Newfoundland and India will send delegates to the conference in the Canadian capital. For some time the question of the date has been the subject of communication by cable with the various parts of the Empire.

The question of the agenda is now expected to be considered. This matter, likewise, will be dealt with by cable communication with the different countries.

In the past, Imperial Conferences have occupied from four to eight weeks. The coming conference will probably last from four to six weeks.

Intra-Imperial preference will be the dominating note of the conference, and the general expectation is that from the conference will come trade arrangements between the different parts of the Empire carrying out this principle.

Alberta Income Tax

Government Expects To Raise Revenue Of \$1,500,000 From This Source

Edmonton, Alberta.—A revenue of \$1,500,000 is expected to be garnered by the proposed provincial income tax.

Government circles indicated the proposal would be introduced early in the session and that it would in no way interfere with the service tax—a form of income tax—at present in effect in Edmonton and Calgary.

Premier J. E. Brownlee and his financial advisers, it was intimated, were considering making the minimum income for taxation \$750 yearly for single persons and \$1,500 for married persons, with an exemption of \$300 for each dependent in the latter case. Rate of taxation is expected to be from two per cent. upward.

Prizes Awarded

Engineering Institute Of Canada Issues List Of Awards For Outstanding Achievements

Toronto, Ont.—The Engineering Institute of Canada, in convention here, issued its annual list of medal and prize awards for outstanding achievements in engineering during 1931.

Engineering Institute prize winners included:

Eric Austin, University of Alberta. H. M. Van Allen, University of British Columbia.

G. L. Good, University of Manitoba. R. Johnson, University of Saskatchewan.

Sir John Martin-Harvey

Noted Actor Now On Seventh Tour Of Canada With New Play

Sir John Martin-Harvey and his London company will be seen at the leading theatres throughout Canada in "The King's Messenger" his new play. This is Sir John's seventh tour in Canada and he likes Canadian audiences. He finds them very appreciative of substantial fare. They do not like "little plays," as he expresses modern comedy. He brought to the Dominion the largest repertoire of plays ever toured, having eight productions, including "Hamlet," "Taming of the Shrew," "Oedipus," "Burgomaster of Stillemonde," "Via Crucis," "David Garrick" and "Cigarette Maker's Romance."

Sir John has played mostly what are termed costume plays, and that, as he explained, because he was brought up in the tradition. He fell into the path naturally "after being weaned on costume productions." He carried on two of the parts created by Irving, the leads in "The Lyon's Mail" and in a version of Scott's "The Bride of Lamermoor" under the title of "The Last Heir."

For three days, commencing Monday, Feb. 15, Sir John Martin-Harvey and his company will be seen at the Darke Music Hall in Regina, in "The King's Messenger."

MISSING SUBMARINE M-2 HAS BEEN LOCATED OFF PORTLAND BILL

The admiralty has announced that the submarine M-2, missing since it dived January 26, with 61 men aboard, had been located at the bottom of the English Channel, nearly six miles off Portland Bill. The vessel, virtually given up as lost after a desperate search for days failed to show a trace of it, was located by the destroyer "Torrid," with powerful apparatus which detected tell-tale sounds. Above is a photograph of the M-2, the first submarine to carry aircraft, and considered one of the finest diving vessels in the British fleet. The map shows the area where the search has been carried out since the accident.

CHAPTER XIII.

"Will You walk Into My Parlour?"

Jean, sculling leisurely down the river which ran between Staple and Willow Ferry, looked around her with a little thrill of enjoyment—the sheer, physical thrill of youth unconsciously in harmony with the climbing sap in the trees, with the upward thrust of young green, with all the exquisite recreation of Nature in the spring of the year.

April had been, as it too commonly is in this northern clime of ours, the merest travesty of spring, a bleak, cold month of penetrating wind and sleet, but now May had stolen upon the world almost unawares, opening with tender, insistent fingers the sticky brown buds fast curled against the nipping winds, and misting all the woods with a shimmer of translucent green.

Overhead arched a sky of veiled, opalescent blue, and Jean, staring up at it with dreamy eyes, was reminded of the "great city" of the Book of Revelation whose "third foundation" was of chalcidony. This soft English sky must be the third foundation, she decided whimsically.

SOUR STOMACH

JUST a tasteless dose of Phillips' Milk of Magnesia in water. That is an alkali, effective yet harmless. It has been the standard antacid for 50 years. One spoonful will neutralize at once many times its volume in acid. It's the right way, the quick, pleasant and efficient way to kill all the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes.

Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia. Be sure to get the genuine.

The ideal dentifrice for clean teeth and healthy gums is Phillips' Dental Magnesia, a superior tooth-paste that safeguards against acid-mouth. (Made in Canada.)

W. N. U. 1928

But the occupation of sky-gazing did not combine well with that of steering a straight course down a stream whose width hardly entitled it to its local designation of "the river," and a few minutes later the boat's nose cannoned abruptly against the bank.

As, however, to tie up somewhere under the trees—which edged the water had been Jean's original intention, this did not trouble her overmuch, and discovering a gnarled stump convenient to her purpose, she looped the painter round it, collected the rug and a couple of cushions which she had brought with her, and established herself comfortably in the stern of the boat.

Everyone else at Staple having engagements of one sort or another, she had promised herself a lazy afternoon in company with the latest novel sent down from Muddie's. But she was in no immediate hurry to begin its pages. The mellow warmth of the afternoon tempted her to the more restful occupation of mere day-dreaming, and as she lay tucked up snugly amongst her cushions, enjoying the sweet-scented airs that played among the trees and over the surface of the water, she allowed her thoughts to drift idly back across the two months she had spent at Staple.

The time had slipped by so quickly that it was hard to believe that rather more than eight weeks had elapsed since that grey February evening when she had alighted on the little, deserted platform at Coombe Elvie Station. They had been quiet, happy weeks, filled with the pleasant building up of new friendships, and Jean reflected that she had already grown to look upon Staple almost as "home." She possessed in a large measure the capacity to adapt herself to her surroundings, and realizing that Lady Anne had been perfectly sincere in her expressed desire to play at having a daughter, Jean had, at first a little tentatively, but afterwards, encouraged by Lady Anne's obvious delight, with more assurance, gradually assumed the duties that would naturally fall to the daughter of the house.

Day by day she had discovered an increasing pleasure and significance in their performance. They were like so many tiny links knitting her life into the lives of those around her, and already Lady Anne had begun to turn to her instinctively in the small difficulties and necessities which, one way or another, most days bring in their train. Jean appreciated this as only a girl who had counted for very little in the lives of those nearest her could do. It seemed to make her "belong" in a way in which she had never "belonged" at Beirnfels. There, Glyn and Jacqueline had turned to each other for counsel in the little daily vicissitudes of life equally as in its larger concerns, and Jean had learned to regard herself as more or less outside their lives.

She had had one letter from Peterson since her arrival at Staple, a brief, characteristic note in which he expressed the hope that she liked England "better than her father ever could" but suggested that if she were bored she should return to Beirnfels, and ask some woman friend to stay

with her; he warned her not to expect further letters from him for some time to come as, according to his present plans—of which he volunteered no particulars—he expected to spend the next few months "as far from civilization as the restricted size of this world permits."

With this letter it seemed to Jean as though the last link with her former life had snapped. She felt no regret. Beirnfels, and the unconventional, rather exotic life she had led there—dictated by her parents' whims and the practically unlimited wealth to gratify them which Peterson's flair for successful speculation had achieved—seemed very far away, and Staple, with its peaceful, even-flowing English life, very near and enfolding.

Her first visit to Charnwood had been a disappointment. Under changing ownerships, little now remained to remind her of the generations of Petersons who had lived there long ago. Such of the old pieces of furniture and china as Peterson had not considered worth transferring to Beirnfels at his father's death had been bought by the next owners of the place, and had been taken away by them when they, in their turn, disposed of the property. Only a great square stone remained, sunk into one of the walls and bearing the Peterson coat of arms and the family motto: "Omnia deo Deo."

Sir Adrian Latimer had translated the words to Jean, with a cynical gleam in his heavy-lidded eyes and accompanying the translation by a caustic reference to her father. The drug had not so far dulled his intellect. On the contrary, it seemed to have had the opposite effect of endowing him with an almost uncanny insight into people's minds, so that he could prick them on a sensitive spot with unerring accuracy and a diabolical enjoyment of the process.

Jean's sympathy for his wife was boundless. A great affection had sprung up between the two girls, and bit by bit Claire had drawn aside the veil of reticence, letting the other see into the arid, bitter places of her life.

Jean could understand, now, of what Claire had been thinking on the occasion of their first meeting, when she had spoken of the influences of the people who inhabit a house. The whole atmosphere of Charnwood seemed permeated with the influence of Adrian Latimer—a grey, sinister, unwholesome influence, like the miasma which rises from some poisonous swamp.

The hell upon earth which he contrived to make of life for his young wife had been a revelation to Jean, accustomed as she had been to the exquisite love and tenderness with which her father had surrounded Jacqueline.

Sir Adrian's chief pleasure in life seemed to be to thwart and humiliate his wife in every possible way, and once, in an access of indignation over some small refinement of cruelty of which he had been guilty, Jean had

"PAINS ALL OVER ME"

Rheumatism Again!

And once again it was the "little daily dose" of Kruschen that conquered it. In fact, it made this sufferer feel ever so well.

"I have been taking Kruschen Salts because of having pains in the back, head and joints; pains all over me, I felt tired going to bed, tired getting up. I was in a very bad way. I was laid up for over a month, and the doctor who attended me said I was suffering from acute rheumatism, and advised me to take Kruschen Salts. In less than 3 months I felt ever so well. I can't thank you enough for Kruschen Salts."—G. O.

The principle is this: Kruschen Salts drive from your body the uric acid crystals which cause your pain. Your pains ease; knotted joints become loose. Afterwards the "little daily dose" of Kruschen so stimulates the liver and kidneys that your inside is kept clean. Mischievous uric acid does not get the chance to accumulate.

FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIANT" packages which make it easy for you to prove our claim for yourself. Ask your druggist for the new "GIANT" 75c package.

This consists of our regular 75c bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it to the test, and then, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. Take it back. Your druggist is authorized to return your 75c, immediately and without question. You have tried Kruschen free, at our expense. What could be fairer? Manufactured by E. Griffiths Hughes, Ltd., Manchester, Eng. (Est. 1750). Importers: McGillivray Bros., Ltd., Toronto.

ROYAL YEAST CAKES

give you breads in tempting Variety..

MEALS become twice as interesting if you vary the bread occasionally.

Rolls, coffee cakes, buns... there's no limit to the breads you can make with Royal Yeast Cakes and the new Royal Sponge* Recipe.

Royal Yeast Cakes keep for months. Be sure to have a supply on hand to use when you bake at home. Send for free Royal Yeast Cake Book. Standard Brands Ltd., Fraser Ave. & Liberty Street, Toronto, Ont.

Royal Sponge* Streusel Cake

To 1½ cups Royal Yeast Sponge* add 2 tablespoons butter, creamed, ½ cup light brown sugar, 1 egg well beaten, 2½ cups flour to make soft dough. Knead lightly. Place in greased covered bowl in warm place. Let rise until double in bulk (about 1½ hours). Roll out dough ½ inch thick, prick with fork, brush top with melted butter and sprinkle with Streusel Topping. Let rise in warm place about 30 minutes. Bake at 350° F. to 400° F. Makes 4 cakes.

Streusel Topping: Cream ¼ cup butter with ½ cup sugar and mix with ½ cup flour, ½ cup bread crumbs and 1 teaspoon cinnamon. Stir until dry and crumbly.

*ROYAL YEAST SPOUGE—Soak 1 Royal Yeast Cake in ½ pint lukewarm water for 15 minutes. Dissolve 1 tablespoon sugar in ½ pint milk. Add to dissolved yeast cake. Add 1 quart bread flour. Beat thoroughly. Cover and let rise over night to double in bulk, keeping in warm place free from draughts. Makes 5 to 6 cups of batter.

Our free booklet, "The Royal Road to Better Health," suggests pleasant ways to take Royal Yeast Cakes and tells how this simple practice will improve your health. Write for it.

Buy Made-in-Canada Goods

declared her intention of giving him her frank opinion of his behaviour. She had never forgotten the look of bitter amusement with which Claire had greeted the suggestion.

"Do you know what would happen? He would listen to you with the utmost politeness, and very likely let you think you had impressed him. But afterwards he would 'make me pay'—for a day, or a week, or a month. Till his revenge was satisfied. And he would put an end to our friendship!"

"He couldn't!" Jean had interrupted impulsively.

"Couldn't he? You don't know Adrian. . . . And I can't afford to lose you, Jean. You're one of my few comforts in life. Promise me"—she caught Jean's hands in hers and held them tightly—"promise me that you will do nothing—that you won't try to interfere? I can generally manage him—more or less. And when I can't, why, I have to put up with the consequences of my own bad management"—with a smile that was more sad than tears.

(To Be Continued.)

Ant-Tuberculosis Vaccine

New Discovery Establishes Complete Immunity For Disease, Is Report

Henri Spahlinger, director of the Institute Bacterio Therapique at Geneva and noted authority on tuberculosis, has published a formula for anti-tubercule vaccine, which, he claimed would establish complete immunity to the disease in human beings and animals.

Spahlinger's announcement came at the conclusion of years of intensive research during which he used up his entire personal fortune of £100,000. He was able to continue his work only through the financial aid of the Aga Khan, the Duke of Westminster and others who appreciated the importance of the problem he sought to solve.

No Rest With Asthma. Asthma usually attacks at night, the one time when rest is needed most. Hence the loss of strength, the nervous debility, the loss of flesh and other evils which must be expected unless relief is secured. Fortunately relief is possible. Dr. J. D. Kellogg's Asthma Remedy has proved its merits through years of service. A trial will surely convince you.

Customer: "You have not been a salesman long?"
Salesman: "How do you know, madame?"

Customer: "You still blush when you mention the prices."

Little Helps For This Week

"Behold, the tabernacle of God is with men, and He will dwell with them."—Revelations xxi. 3.

How far from here to heaven?
Not very far, my friend;
A single, hearty step
With all thy journey end.
Hold then! Where runnest thou?
Heaven is within thee.
Seek'at thou for God elsewhere,
His face thou'lt never see.
—Angelus Silesius.

If that thou seekest thou findest
not within thee, thou wilt never find
it without thee.—Arabian.

Moses asked of God where He was,
and God said: "Know that when thou
hast sought me, thou hast already
found Me."—Arabian.

A woman writer remarks that
there are many people who cannot
live on an income of £5,000 a year.
We must admit that we have never
done it.

COMFORT for COLICKY BABIES

... THROUGH CASTORIA'S GENTLE REGULATION

The best way to prevent colic, doctors say, is to avoid gas in stomach and bowels by keeping the entire intestinal tract open, free from waste. But remember this: a tiny baby's tender little organs cannot stand harsh treatment. They must be gently urged. This is just the time Castoria can help most. Castoria, you know, is made specially for babies and children, it is a pure vegetable preparation, perfectly harmless. It contains no harsh drugs, no narcotics. For years it has helped mothers through trying times with colicky babies and children suffering with digestive upsets, colds and fever. Keep genuine Castoria on hand, with the name:

Wm. H. Fletcher

(Continued from front page)

costly inconvenience caused to his parents. If it had not been for an extra
piece of clothing on this boy's legs he
might possibly have suffered for weeks.These dogs are owned by a few of
our citizens who no doubt think they
(the dogs) are always of a gentle nature,
patient, etc. I would dare suggest to
the owners of these dogs that there
is a treacherous "back wash" in their
breeding; that domesticity cannot entirely
eliminate and at times the most
modest and well-behaved of the breed
is liable to turn on the child that has
it for a pet.I understand that in Australia the
entrance of this breed of dog is entirely
forbidden. No doubt our friends
from "down under" have foreseen the
consequences.May I humbly suggest to our City
Fathers and also members of the school
board that this menace should be stopped
as it is heartrending to see any
of our children trying to fight its way
away from one of these beasts.A deterrent to this menace is suggested
by the writer of this letter by
having our Village Council place a
luxury tariff on these "pets" with an
increase of about 100 per cent and if
the owners of these still wish to keep
them, see that they are muzzled when
running at large, because they cannot
be trusted.Possibly the contents of this letter
will cause quite a howl from the owners
of these dogs, but I am sure they will
see the logic of my reasoning, as I
happen to be a parent of one of these
children who was badly mauled and
if they were to put themselves in my
place no doubt they would be as vehement
as I have been.
